

Classic GT40

Made in
Australia

12 Year
Warranty

60% Recycled
Materials

40mm Pile
Height

RRP: See Webpage or Contact Us for a Quote

To purchase, enquire at info@paulmunnsinstant.com.au, call us on 8298 0555, or visit us at 358 Brighton Rd, Hove.

This new premium landscaping solution is an Australian and world first, being made with 60% renewable sources! Classic GT40 has all the benefits of a durable, heat and UV resistant, water permeable and fully recyclable artificial grass, with organic materials derived from sugarcane. Classic GT40 feels luxurious. It's thick and soft and we think you'll love it, from the first moment you run your fingers through it.

Due to being sourced naturally from sugarcane, Classic GT40 absorbs CO2 rather than emitting it like other oil based products do. Thereby this sustainable and recyclable product offers consumers the advantages of synthetic turf whilst reducing their carbon footprint. Standard petroleum-based practices to produce raw materials emit 5kg of CO2 per 1kg of polyethylene product, unlike sugarcane-based polyethylene.

In this new exciting technological advancement, the same amount of sugarcane-based polyethylene can capture this same amount of greenhouse gas in a typical 18 month growing season. Due to its short growing season sugar cane is a highly renewable and sustainable resource. Classic GT40 is also infused with Heatblock technology to keep surfaces significantly lower than traditional artificial lawn.

This latest innovation in artificial grass is soft and lush and perfect for homes, schools, landscape areas and more. A greener solution of artificial grass with the confidence of Australian Made quality, Classic GT40 is an excellent turf solution backed by an incredible 15-year warranty.

Quality artificial grass just got real!!

Key Features

Australian Made - Classic GT40 is sourced from and manufactured in Australia for a local landscaping solution.

15 Year Warranty - Classic GT40 has a whopping 15 year warranty, which is up to 10 years longer than our other synthetic varieties.

Environment Friendly - 60% of the material in Classic GT40 is derived from sugarcane, and the turf is fully recyclable. It absorbs carbon dioxide instead of emitting it like other oil-based synthetic products do.

40mm Pile Height - Classic GT40 has a tall 40mm pile height, making for a lawn that has a softer feel and lush appearance.

Premium Range

Our Premium Range offers a selection of high-quality, dense synthetic turfs chosen for their long warranty duration, solid backing construction and high stitch rates. These features produce a lawn that is durable, soft, and has a natural appearance.

UV Stabilisation

All synthetic turf sold at Paul Munns is UV stabilised, which is a very important feature in synthetic grasses. The pigment in the synthetic grass will not fade over time from the stress of the intense sunlight we receive in South Australia.

COOLplus[®] Technology

Classic GT40 has COOLplus technology, which means it has 20-25% cooler surface temperatures compared to other synthetic turf products. This is because sunlight is comprised of a wide spectrum of radiation including visible light, UV radiation and infrared (IR). Infrared radiation causes molecular vibration, which translates into heat energy when absorbed by an object. COOLplus yarn technology does not absorb infrared rays, translating into less molecular vibration and cooler surface temperatures. It also creates more of a matte finish to the synthetic fibres, reducing the often shiny appearance of artificial grass.

Specifications

Roll Width	3.71
Pile Height	40mm
Sand Infill	13kg per sq/m
Warranty length	15 years
COOLplus Technology	Yes
Density	Very high
Colour Palette	

Summary

- Made from 60% renewable resources derived from Sugar Cane
- Uses same Green Technology as Olympic hockey turfs
- Combines multi-coloured 40mm grass blades with polypropylene thatch zone of natural colours
- HeatBlock™ cooling technology
- Creates a soft touch, high weight landscaping solution
- Super high density
- UV Stabilised
- Pet friendly
- Made in Australia

Determining How Much You'll Need

All our synthetic turf varieties are sold by the lineal metre, but priced by the square metre. This means you will have to buy a certain length of the pre-determined width. For example, because Classic GT40 is 3.71m wide, if you were to buy 10m² of it you would receive just under 2.7 Lm of grass (10sq/m divided by 3.71). Likewise, if you are after 5 Lm you would order 18.6m² (5Lm times 3.71m). We agree that it would make more sense to just price it by the lineal metre, however this is how the rest of the market sells synthetic grass - so to make it easier for you to compare prices we've decided to follow suit.

If you plan your area incorrectly, the joins may be noticeable or you could end up with unnecessary wastage. This could lead to you spending more money than you need to on a finished product that you aren't happy with. If you would like to order synthetic turf, feel free to contact one of our synthetic turf specialists on 8298 0555. They will be happy to help you through the process of choosing the right variety, planning the area perfectly and getting the lowest price for shipping so you end up with the best result for the best price.
