

# Paul Munns Fertiliser Guide

*“One of the best things you can do for your lawn is to ensure it gets the right amount of nutrient at the right times of year”* PAUL MUNN

## ► Why Fertilise?

We recommend fertilising your lawn three times per year with Paul Munns Specialty formulated fertilisers for optimal performance, health, appearance and drought tolerance. It's important to give your lawn a variety of nutrients to ensure it has what it needs to stay in top shape, all year round.

### Performance

Better resilience. Your lawn will repair faster, have more vigour and withstand more traffic. Just what you need when the going gets tough

### Health

Better disease and pest resistance. Boost your lawns natural ability to stay healthy with less reliance on chemicals

### Appearance

Better year round colour. Your lawn will stay greener for longer giving you the lush green look you're after

### Drought Tolerance

Better drought tolerance. Healthy lawns develop deeper root zones which leads to less water use

## SPRING Greenkeeper

A high analysis mineral fertiliser containing slow release nutrients, trace elements and Iron. A complete blend Ideal for bringing lawns out of Winter dormancy . Ideal for spring feeding.

## SUMMER Organic Lawn Food

Certified 100% organic , containing seaweed kelp, fish emulsion , humic acid and chicken manure. Gently feeds your lawn while restoring soil health. Ideal for summer feeding

## AUTUMN Emerald Green

Fast acting and super strong with extra potassium and phosphorus. Gives your lawn what it needs to better deal with the rigours of winter. Ideal for Autumn feeding
